

Active Holder for Fixed Installation

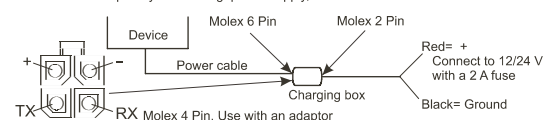

With Molex adapter system

An active holder with a straight cable with open end for fixed installation and a cable with Molex adapter system. The cables are to be connected inside the dashboard, this gives a discreet, neat installation without cables hanging over the interior.

You can choose to use the holder as an active holder only for charging, or to connect an adaptor to the Molex connector for additional features. Then you can use the holder also for power supply of a GPS receiver, data transfer or other own solutions. (Support for TX/RX signal in the device is required.)

The holder is attached onto a tilt swivel so it can be adjusted in order to avoid light reflection. Attach onto the ProClip Mounting Platform.

Molex 4 Pin adaptor system for e.g. power supply, data transfer etc.

2nd Generation

New improved charger

The 2nd Generation Molex active holder has now been released. The charger has many improved features, such as

- New overmoulded connector
- Improved protection against peaks
- Built-in resettable fuse in the box (2 A)
- Improved overload protection
- New box design, with ventilation holes
- More efficient charging, generates less heat

The product is CE and E approved.
Connect the power cable with a 2 A fuse.
5 Volt out.
2 A charger.
